

Appendix I: Glossary of Terms

Agricultural Land: means land primarily devoted to the commercial production of horticultural, viticultural, floricultural, dairy, apiary, vegetable, or animal products or of berries, grain, hay, straw, turf, seed, Christmas trees not subject to the excise tax imposed by RCW 84.33.100 through 84.33.140, or livestock and that has long-term commercial significance for agricultural production.

Arterial [Minor]: a roadway providing movement along significant corridors of traffic flow. Traffic volumes, speeds and trip lengths are high, although usually not as great as those associated with principal arterials.

Arterial [Principal]: a roadway providing movement along major corridors of traffic flow. Traffic volumes, speeds and trip lengths are high, usually greater than those associated with minor arterials.

Available Capital Facilities: means that facilities or services are in place or that a financial commitment is in place to provide the facilities or services within a specified time. In the case of transportation, the specified time is six years from the time of development.

Capacity: the measure of the ability to provide a level of service on a public facility.

Capital Facility: means a physical structure owned or operated by a government entity which provides or supports a public service.

Capital Improvement: means physical assets constructed or purchased to provide, improve or replace a public facility and which are large scale and high in cost. The cost of a capital improvement is generally non-recurring and may require multi-year financing.

Collector: a roadway providing service which is of relative moderate traffic volume, moderate trip length and moderate operating speed. Collector roads collect and distribute traffic between local roads or arterial roads.

Commercial Uses: activities within land areas which are predominantly connected with the sale, rental and distribution of products, or performance of services.

Comprehensive Plan: means a generalized coordinated land use policy statement of the governing body of a county or city that is adopted pursuant to this chapter.

Concurrency: means that adequate capital facilities are available when the impacts of development occur. This definition includes the two concepts of "adequate capital facilities" and of "available capital facilities" as defined above.

Consistency: means that no feature of a plan or regulation is incompatible with any other feature of a plan or regulation. Consistency is indicative of a capacity for orderly integration or operation with other elements in a system.

Contiguous Development: means development of areas immediately adjacent to one another.

Critical Areas: include the following areas and ecosystems: (a) Wetlands; (b) areas with a critical recharging effect on aquifers used for potable water; (c) fish and wildlife habitat conservation areas; (d) frequently flooded areas; and (e) geologically hazardous areas.

Density: a measure of the intensity of development, generally expressed in terms of dwelling units per acre. Can also be expressed in terms of population density [i.e., people per acre]. Useful for establishing a balance between potential local service use and service capacities.

Domestic Water System: means any system providing a supply of potable water for the intended use of a development which is deemed adequate pursuant to RCW 19.27.097.

Financial Commitment: means that sources of public or private funds or combinations thereof have been identified which will be sufficient to finance capital facilities necessary to support development and that there is assurance that such funds will be timely put to that end.

Forest Land: means land primarily useful for growing trees, including Christmas trees subject to the excise tax imposed under RCW 84.33.100 through 84.33.140, for commercial purposes, and that has long-term commercial significance for growing trees commercially.

Geologically Hazardous Areas: means areas that because of their susceptibility to erosion, sliding, earthquake, or other geological events, are not suited to the siting of commercial, residential, or industrial development consistent with public health or safety concerns.

Growth Management: a method to guide development in order to minimize adverse environmental and fiscal impacts and maximize the health, safety, and welfare benefits to the residents of the community.

Household: a household includes all the persons who occupy a group of rooms or a single room which constitutes a housing unit.

Impact Fee: a fee levied by a local government on new development so that the new development pays its proportionate share of the cost of new or expanded facilities required to service that development.

Industrial Uses: the activities predominantly connected with manufacturing, assembly, processing, or storage of products.

Infrastructure: means those man-made structures which serve the common needs of the population, such as: sewage disposal systems, potable water wells serving a system, solid waste disposal sites or retention areas, stormwater systems, utilities, bridges and roadways.

Intensity: a measure of land uses activity based on density, use, mass, size and impact.

Land Development Regulations: means any controls placed on development or land use activities by a county or city, including, but not limited to, zoning ordinances, subdivision ordinances, rezoning, building construction, sign regulations, binding site plan ordinances or any other regulations controlling the development of land.

Level of Service [LOS]: an indicator of the extent or degree of service provided by, or proposed to be provided by, a facility based on and related to the operational characteristics of the facility. LOS means an established minimum capacity of capital facilities or services provided by capital facilities that must be provided per unit of demand or other appropriate measure of need.

Long-term Commercial Significance: includes the growing capacity, productivity, and soil composition of the land for long-term commercial production, in consideration with the land's proximity to population areas, and the possibility of more intense uses of the land.

Local Road: a roadway providing service which is of relatively low traffic volume, short average trip length or minimal through traffic movements, and high volume land access for abutting property.

Manufactured Housing: conventional housing utilizing premanufactured components.

Minerals: include gravel, sand, and valuable metallic substances.

Mobile Home: a single portable manufactured housing unit, or a combination of two or more such units connected on-site, that is:

- a. designed to be used for living, sleeping, sanitation, cooking, and eating purposes by one family only and containing independent kitchen, sanitary, and sleeping facilities;
- b. designed so that each housing unit can be transported on its own chassis;
- c. placed on a temporary or semi-permanent foundation; and
- d. is over thirty-two feet in length and over eight feet in width.

Multi-Family Housing: as used in this plan, multi-family housing is all housing which is designed to accommodate two or more households.

Owner: any person or entity, including a cooperative or a public housing authority [PHA], having the legal rights to sell, lease, or sublease any form of real property.

Planning Period: means the 20 year period following the adoption of a comprehensive plan or such longer period as may have been selected as the initial planning horizon by the planning jurisdiction.

Public Facilities: include streets, roads, highways, sidewalks, street and road lighting systems, traffic signals, domestic water systems, storm and sanitary sewer systems, parks and recreational facilities, and schools.

Public Services: include fire protection and suppression, law enforcement, public health, education, recreation, environmental protection, and other governmental services.

Regional Transportation Plan: means the transportation plan for the regionally designated transportation system which is produced by the Regional Transportation Planning Organization.

Regional Transportation Planning Organization (RTPO): means the voluntary organization conforming to RCW 47.80.020, consisting of local governments within a region containing one or more counties which have common transportation interests.

Resident Population: means inhabitants counted in the same manner utilized by the US Bureau of the Census, in the category of total population. Resident population does not include seasonal population.

Right-of-way: land in which the state, a county, or a municipality owns the fee simple title or has an easement dedicated or required for a transportation or utility use.

Rural Lands: means all lands which are not within an urban growth area and are not designated as natural resource lands having long term commercial significance for production of agricultural products, timber, or the extraction of minerals.

Sanitary Sewer Systems: means all facilities, including approved on-site disposal facilities, used in the collection, transmission, storage, treatment or discharge of any waterborne waste, whether domestic in origin or a combination of domestic, commercial or industrial waste.

Shall: means a directive or requirement.

Should: means an expectation.

Single-Family Housing: as used in this plan, a single-family unit is a detached housing unit designed for occupancy by not more than one household. This definition does not include mobile homes, which are treated as a separate category.

Solid Waste Handling Facility: means any facility for the transfer or ultimate disposal of solid waste, including land fills and municipal incinerators.

Transportation Facilities: includes capital facilities related to air, water or land transportation.

Transportation Level of Service Standards: mean a measure which describes the operational condition of the travel stream, usually in terms of speed and travel time, freedom to maneuver, traffic interruptions, comfort, convenience and safety.

Transportation System Management (TSM): means low capital expenditures to increase the capacity of the transportation network. TSM strategies include but are not limited to signalization, channelization, and bus turn-outs.

Transportation Demand Management Strategies (TDM): means strategies aimed at changing travel behavior rather than at expanding the transportation network to meet travel demand. Such

strategies can include the promotion of work hour changes, ride-sharing options, parking policies, telecommuting.

Urban Growth: refers to growth that makes intensive use of land for the location of buildings, structures, and impermeable surfaces to such a degree as to be incompatible with the primary use of such land for the production of food, other agricultural products, or fiber, or the extraction of mineral resources. When allowed to spread over wide areas, urban growth typically requires urban governmental services. "Characterized by urban growth" refers to land having urban growth located on it, or to land located in relationship to an area with urban growth on it as to be appropriate for urban growth.

Urban Growth Area: means those areas designated by a county pursuant to RCW 36.70A.110.

Utilities: means facilities serving the public by means of a network of wires or pipes, and structures ancillary thereto. Included are systems for the delivery of natural gas, electricity, telecommunications services, and water and for the disposal of sewage.

Visioning: means a process of citizen involvement to determine values and ideals for the future of a community and to transform those values and ideals into manageable and feasible community goals.

Wetland: means areas that are inundated or saturated by surface water or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas. Wetlands do not include those artificial wetlands intentionally created from non-wetland sites, including, but not limited to, irrigation and drainage ditches, grass-lined swales, canals, detention facilities, wastewater treatment facilities, farm ponds, and landscape amenities. However, wetlands may include those artificial wetlands intentionally created from non-wetland areas created to mitigate conversion of wetlands, if permitted by the county or city.

Zoning: the demarcation of an area by ordinance [text and map] into zones and the establishment of regulations to govern the uses within those zones [commercial, industrial, residential] and the location, bulk, height, shape, and coverage of structures within each zone.
